

4,5 α -Dihydrotestosterone, 1mM

Cell Culture Reagents-Hormone and Ligand

产品编号:	CH002
产品描述:	Testosterone secreted by the testis is converted to dihydrotestosterone in the target tissues where it appears to mediate many of the biological actions of testosterone. Androgens direct the development of the male phenotype during embryogenesis and at puberty.
中文名称:	合成类雄激素
其它名称:	17 β -Hydroxy-5 α -androstan-3-one, 4,5 α -Dihydrotestosterone, Androstanolone, Stanolone, DHT
分子式:	C19H30O2
分子量:	290.44
CAS 编号:	521-18-6
产品类型:	Ready-to-use, absolute ethanol solution
纯度:	≥97.5% (powder)
浓度:	1mM
包装规格:	1.0 mL
储存温度:	-20°C

FOR RESEARCH USE ONLY, NOT FOR USE IN DIAGNOSTIC AND THERAPEUTIC PROCEDURES
